

Dive Clean 125 Water Filter

If your aquarium is supplied with a Dive Clean model #125 water filter please read this document.

Dive Clean filters are sometimes supplied with extra parts. For coffee table aquariums these parts are not required. Sometimes these parts are already removed from the aquarium kit.

Do not use the Airline Tube. The Airline Tube supplied will cause the glass table top to get dirty in a few hours. Coffee table aquariums allow the fish to have plenty of air. Discard the Airline Tube, Tube Holder, and Air Filter; you will not need them.

Do not use the Water Flow Diffuser. Sometimes this item is supplied with the filter (shown at the top right of the photo). Some Dive Clean filters will not have this item in the box.

Do not use the second Floss Filter Cartridge. Dive Clean 125 instructions show two Floss Cartridges and one Carbon Cartridge. This will make the filter too tall for the coffee table aquarium. Instead of two floss cartridges (type B in the Dive Clean instructions), use only one. This will make it into a Dive Clean 85 II (as shown in the filter instructions).

Charcoal. As on any aquarium filter you must rinse the charcoal before using it or it may cloud the water.

See our web page or aquarium manual for more information.
